Experience

Platform/Systems Software Engineer

Colorado Springs, CO

SRAM LLC

Feb 2025 – Present

Support development of Tauri desktop applications by building out cross-platform Bluetooth Low Energy connection logic.

Support comprehensive hardware-in-the-loop test coverage of our BLE logic primarily targeting nrf52 peripherals.

Responsive to the rapid upstream hardware iteration of future products.

Maintain Rust <> C/CPP interop via bindgen.

Application Software Engineer

Colorado Springs, CO

SRAM LLC

Feb 2023 – Feb 2025

Extend and maintain Windchill used for managing SRAM's product data (design, testing, manufacturing). ie: Product Lifecycle Management (PLM).

Contribute new features to and maintain a 20+ year old Java codebase.

Modernized and improved the project's use of java's type system to catch more errors at compile time.

Refactored project-wide logging to reduce runtime performance by up to 45%.

Build UI's with ExtJS.

Software Engineer (College)

Madison, WI

VERVE INDUSTRIAL PROTECTION

Sep 2019 – Aug 2021

Support an ICS/OT Endpoint Management solution by adding new device support. Member of the Agentless Device Inventory (ADI) team.

Research and investigate PLC's via reading manufacturer provided specifications or reverse engineering communication protocols with Wireshark.

New device support was often written in C, but exposed to the Endpoint Management software via CPython bindings.

Interacted with Rockwell, Hirschmann, and Bachmann family devices.

The Verve EMS interacted closely with aDolus FACT platform to provide visibility into device inventory, software supply chain, and vulnerability.

Junior Technician

Stevens Point, WI

KOZAR TECHNOLOGIES

Jun 2018 – Aug 2019

Deploy and service networking, security, and audio systems in residential and small-medium commercial settings.

Experience with running, terminating cat5e networking as well as some basic network configuration (VLANs).

Experience installing RFID security card readers.

Experience with setting up multi-room speaker systems

Skills

Professional

Rust, Linux, Java, CLI development, C/C++, Python, Reading the docs

Hobbyist

NixOS, Ansible, Docker, Golang, Embedded C, Nmap, Wireshark, Binary Analysis

Education

B.S. Computer Science

Madison, WI

UNIVERSITY OF WISCONSIN-MADISON

2018 – 2022

Relevant coursework: Operating Systems, Computer Architecture, Algorithms, Programming Languages, Computer Networks, Distributed Systems, Security, Machine Learning
